CAREER OBJECTIVE

Computer Science & Engineering undergraduate with a growing foundation in Java, Python, data structures, object-oriented programming, web development, and machine learning. Interested in software development and data-driven problem solving, with a strong focus on building practical skills through coding practice, academic projects, and continuous learning.

EDUCATION

B.Tech — Computer Science & Engineering

JNTUH-affiliated / autonomous engineering college, Telangana

2025–2029

Currently pursuing

TECHNICAL SKILLS

Programming	Java, Python, C
Core CS	Object-Oriented Programming (OOP), Data Structures & Algorithms, Problem Solving
Web	HTML, CSS
Data & ML	NumPy, Pandas, Matplotlib, Scikit-learn, SVM, Linear/Logistic Regression
Tools	Jupyter Notebook, VS Code, Git/GitHub (learning)

ACADEMIC PROJECT

Breast Cancer Classification using Support Vector Machine (SVM)

- Built and evaluated Linear, Polynomial, and RBF SVM classification models on the breast cancer dataset.
- Applied feature scaling and compared model performance using accuracy, precision, recall, and F1-score.
- Used Pipeline and GridSearchCV with cross-validation to tune kernel and hyperparameters such as C, gamma, and degree.

CODING & LEARNING EXPERIENCE

- Practicing Java programming with emphasis on OOP, methods, constructors, arrays, collections, stacks, and problem solving.
- Solving algorithmic problems on coding platforms to improve logical thinking and implementation speed.
- Studying Python-based data analysis and machine learning workflows, including preprocessing, visualization, model training, and evaluation.
- Developing foundational web skills using HTML and CSS.

STRENGTHS

Problem solving • Willingness to learn • Consistent practice • Analytical thinking • Team collaboration

AREAS OF INTEREST

Software Development | Data Science | Machine Learning | Web Development
